

I get a show called Mosaic via satellite which is a digest of news from Middle Eastern independent and government run stations. This is the only place I have seen news as consistently slanted and oversimplified as the current network and cable news stations. If we have wall to wall MurdochTV it will only get worse. I am an activist and tend to write letters but in conversations with others at work and in my neighborhood, both Republican and Democrat, I find that this is one subject where most tend to agree. Please don't downgrade what diversity we have.
